Winter 2009

## Thanks, & Joy to You!

It has been a busy year for us and probably for you, your family & friends too. With all the things going on in the world, & at home, we hope you can slow down the world just a little bit this Christmas, look around your wonderful life, & take stock in the things that make your life special.

One of the wonderful things about our business is the knowledge that sometimes, we help give families a little more together time at home. We try to give you a bit more joy, entertainment, refuge, & quality time together.

Hopefully we've increased your quality family time. Our systems bring escape & enjoyment thru music & movies, plus simple control of all new technologies. Our goal is to help enrich your life in a meaningful way.

Music is the soundtrack of your life, and few joys rival getting lost in finely reproduced music on one of our audiophile systems. Our home automation systems bring the latest technology, & the power of the internet. Our home theaters give everyone a place to escape to, plus bit of magic.

Our installation & design services are there to help remove the stress & time spent on areas perhaps you don't specialize in. & our goal is to deliver a great experience, & free up more time for you to do what matters most in your life, secure in knowing the job is done right.

We try to provide real life enhancing returns on your investment. Not just monetary, but adding value by increasing your quality of life. All with a bit of fun thrown in too.

Christmas is on the way you know, & cool products that can give you a bit more fun are arriving daily. Here are some ideas that might help avoid stress, & add fun for the family this Christmas.

We also want to take this time to extend our heartfelt thanks for your support. You have allowed us to do what we love and our success is directly a result of you. We are truly thankful to you and hope you enjoy the season, and all the joy it can bring. All the best to you, from all of us!

## Blu-ray Players

If you don't have a Blu-ray player yet, now is the time. Seeing the latest blockbuster in full HD glory, with fantastic sound is an experience you and the family will love.

Samsungs latest offerings boast all the latest technologies, including the ability to play video directly off a USB thumb drive, in HD too!

Internet connectivity through a Blu-ray player also offers you possibilities that your old DVD player never even thought of! Check them out today.

## Control 4

If you are thinking about a gift for your home, forget a barbecue, home control is way better! It's more than a universal remote or smart lighting. It links and controls the electronics and systems in your home – through one easy-to-use interface.

Control4 offers a great option that's not an all-or-nothing solution. You can start with a basic system & upgrade over time with solutions that fit your lifestyle as well as your budget.

Control4 products are easily installed in both new and existing homes. Using wireless & wired technology no room is unreachable!

A complete home-control solution can be installed and programmed in a matter of hours or days so you can begin enjoying it right away.

Automation takes all of the technology in your home & makes it work together effortlessly. It allows you to start out small and grow as your needs change.

So if you are considering a whole house A/V system, lighting control or just need a set of speakers out on the deck wirelessly, here's your solution!

## iPod Docks For Your Stereo

***This cool remote will display the iPods on screen information***

Ahh, the iPod. What a revolution. Most of us have at least one, & while they started out as a replacement for the old cassette walkman, (go ask your mom) now they are the primary music repository for many households. But currently, most people don't have an easy way to play all that great music through their home music system., and that's a shame.

That's where we come in! We have the largest selection of iPod solutions that can give you all that music effortlessly through your home system.

Wireless control, Bluetooth connectivity & fantastic sound are all possible, & they make a great Christmas gift for anyone too. Ask us for how to make iPods sound their best too!

***No one has more industry awards for their subwoofer design and quality than Definitive Technology!***

There isn't a system out there that won't sound better, play louder & have more punch by adding a subwoofer.

Today's music & movie sound tracks have more dynamic low frequency content than ever before, & most speakers are just not capable of reproducing it accurately.

Any system can connect to a subwoofer, & most subwoofers have power amps built in to handle the chore—an extra bonus.

## Subwoofers

As a result, adding a subwoofer not only gives better quality base, but the system increases in power, clarity & volume capability.

We have a bunch of great subwoofer options, in every budget range, & they don't have to be big. Definitive Technology's SuperCube line starts at just 12 inches square, & delivers sound that will blow you away.

Drop by for a demonstration, or take one home for a weekend test drive...bet you won't want to return it!

## Stewart Constant Height Screen

We all know real Home Theater has a projector & a screen, & the best home theaters have a great projector & a great screen.

We also know that Stewart Film-screen are the undisputed kings in filmscreen technology, & they have the awards and client list to prove it.

Their latest technology in projector screens is their constant height CineCurve. Aimed at the film buff who wants their movie

The CineCurve features a native 2.40:1 image area allowing full enjoyment and flexibility when watching movies in super-wide screen formats, and also has the ability to conform to HDTV and NTSC TV formats

in the highest resolution & native wide aspect ratio, it boasts all that with no black bars or compromise for HDTV viewing.

It uses a curved bezel, a motorized masking system & a high performance motorized lens assembly to deliver the finest private cinema experience.

You have to see it to appreciate how good it looks, & how trick it is too - & that's why we have one set up for you to do just that...

## Sound Bars

The latest crop of flat HDTV's are great in almost every way. One area they can stand improvement in is their speakers. There just isn't enough room in them to put a good sounding speakers system in.

The solution is a Soundbar. These specialized TV speaker systems can deliver great convincing surround sound with no extra speakers behind you & look right under your cool new flatscreen TV.

We have a large selection of sizes & options including units that have built in Blu-ray players, iPod docks & radio tuners, giving you a single elegant solution to deliver movies and music from any TV location.

You can wall mount them under the TV, on their included brackets or place them on a shelf—whatever is best for you. The newest Samsung option even includes a wireless sub-woofer, so install is a breeze.

Great sound, more inputs & a really sleek design make a Soundbar a must have option for your flatscreen TV.

## Cool Mini Systems

There are so many rooms of the house left out when it comes to music. Ghetto blasters are just so 80's, & if you are going to add mu-

sic to the home office, bedroom or kitchen—style, sound quality & the latest net and iPod technologies all need to be considered.

We have a variety of great local music systems to choose from that fit the bill, including the new Yamaha TSX series, offering Clock Radio functions with 2 Alarms, iPod Dock CD & big rich sound.

Britain's leading high end manufacturer Arcam makes one called the

Solo Mini, with high performance sound, CD, Radio & USB jump drive playback, too. So forget the blaster, get the cool one!

## Headphones

Everybody needs at least one set of really good headphones, maybe more. Enjoying music privately can be a real joy while working out, cutting the lawn or just listening to TV at night. We have great sounding models from the worlds finest manufacturers, including Sure, Klipsch, Grado, Sennheiser & Monster. Here are a couple that are great popular performers.

Monster's new In-Ear headphone "Monster Beats" have tangle-free earphone cables, & a sealed in-ear design which reduces external noise for a better music experience than traditional earbuds too.

Sennheiser's offering in high performance wireless headphones offer great sound while listening to your favorite music or TV. It's a closed, RF wireless headphone system, equipped with balance control and switchable compression for better speech intelligibility. The headphones are able to go loud, so they are ideal if a bit of extra volume is needed, while their closed design prevents sound leakage. When the headphones are placed on the dock, the built in battery charges, so they are always ready to go!

## URC's New Color Touch Screen Remote

This is URC's latest tour de force 2-way wand-style touch screen color remote. It provides network control of many popular IP-based components. In addition to its stunning design it offers a fully customizable GUI on a large color screen that sends vibrating "haptic" feedback confirming each button selection.

Control where every surface, every contour, and every button has been designed to feel "right." It's one of the latest 2 way remotes allowing data to be shown on the screen from your source, or the web.

That sounds pretty high tech doesn't it? But it's simplicity and feel that make this a real winner.

The MX-5000's bright, vivid color touch screen is mounted in a remote con-

table full of remotes! Custom programmed to operate your equipment, it's the answer to a coffee
